

# **ADOPTING A PET**

## **from**

# **PORT KENNEDY VETERINARY HOSPITAL**

---

*Port Kennedy Veterinary Hospital* donates – staff time, vet checks, medication, worming products, flea products, food, shelter and love to all of our stray animals.

We do not make a profit on any of the procedures and treatments performed on the animals we rehome.

To ensure that the cycle of unwanted animals and spread of infectious diseases is not continued, your new pet is vaccinated and desexed before rehoming or prepayment for desexing and full vaccination is required to be deposited on your account before an animal is released to its new home.

Practice owners, Dr David Hoare and Dr Margaret Horsley have kindly allowed us to offer you a special adoption package for our cats in need of homes.

For *kittens* a payment of \$180.00 will include all three kitten vaccinations, up to date flea treatment and worming, microchip, and desexing for your kitten, a 1kg bag of *Hills Vet Essentials* kitten food and a reusable cat carrier.

*This is an approximate saving for you of up to \$400.00*

For *Adult Cats* who have been previously desexed at another clinic, a payment of \$58.00 will include an adult Fe3 vaccination, up to date flea treatment and worming, microchip, a 1kg bag of *Hills Essentials* adult feline food and a reusable cat carrier.

*This is an approximate saving for you of up to \$250.00*

Please help us find furrever homes for our beautiful adoptees, if you or anybody you know is looking for an 'indoor only' feline family member, please consider the *Port Kennedy Veterinary Hospital* first.

Thank you for your continued support!

*Port Kennedy Vet Hospital Team*
